"I highly recommend
Intelligent Ice"

Product of Australia

Benefits

- Temperature controlled liquid with a memory
- Remains at a safe comfortable cold temperature for up to 4 hours
- Remarkable for pain relief and you can wear it all day and all night
- You can wear it to bed, under or over your clothes at work or recreation and travel
- Amazing technology using natural ingredients
- No water, No condensation, No mess
- You will be amazed at the rapid healing time
- Stays at the set temperature for its life span - years
- Universal Space technology cooling material covers
- Universal applications for Humans, Animals and Pets. Product sizes 32cm x 27cm and 25cm x 13cm
- Extra extension straps to fit all sizes from small to large
- Tax deductible
- Endorsed by leading doctors and experts
- Endorsed by leading sporting personalities

Applications:

All households
All sports clubs
All workplaces
All cosmetic procedures

Testimonials

- Dr. Jorge Andrade - "Awesome I am amazed"
- Dr. Ondrej Rejda - This is a remarkable product
- Darby McCarthy - This product is an awakening
- Tommy Good - Now I can say I have witnessed a miracle
- Mick Hill - This is state of the art technology
- Howard Wilson - Breakthrough cures shin soreness
- Pat O'Keeffe-Brillant - a real life saver

- Sprained Muscles
- Pulled Muscles
- Sports Injuries
- Shin soreness
- Any Joint or Muscle Pain
- Ankle Pain
- Sore Feet
- Insect Bites
- Animal Injuries and Soreness

Try Intelligent Ice ...

Doctors recommendation

Dr. Andrade said with Intelligent Ice I recovered from chronic back pain within 24 hours normally it took up to 2 weeks. The advantage of Intelligent Ice there is no freeze burn, and because you can wear it day and night it constantly gives you pain relief and continues to constantly cool the injured area which is why it results in a speedy recovery. It is important to use cold therapy during the first 48-72 hours. Following an injury, blood vessels rupture and cause blood to pump freely (haemorrhaging) and form pockets under the skin resulting in bruising and swelling (oedema) at the injury site. Bruising and swelling puts extra pressure on the surrounding area and causes pain and restricted movement.

How it works

The Intelligent Ice liquid is not made of water but contains a unique formula of natural ingredients. The liquid is programmed in the laboratory to retain a unique memory for its life span years. Every time you take the ice pad out of the freezer the temperature will be at minus 12c but is programmed not to freeze burn you. The temperature will gradually rise over about 1 hour to the programmed cooling temperature of 7-8c above and maintains cooling the body for up to 4 hours even when the liquid has completely melted. It only takes 1.5 hours to re-freeze again, this is an amazing 21st century technology.

For Humans
Animals
Pets

How to test if your product works

Hold the ice pad in one hand and a block of ice in the other hand the ice block will freeze burn you within 1 minute the ice pad will not. Then attach the Intelligent Ice covers firmly to your leg or back for 4 hours but during this time take it off several times and feel your body where it has been attached. Amazingly due to the magic liquid formula and covers your body will feel cold.

When to use Intelligent Ice

Strap on the Intelligent Ice immediately after exercise, pain or injury. It restricts blood flow to the affected area and allows the delicate blood vessels to repair quickly, speeding the healing process you can leave it on day and night if required. Depending on the climate and temperature Intelligent ice should last up to 4 hours or more then take it out and put it in the freezer for 1.5 hours or less then strap it on again. Parents have found their children will wear it because it is comfortable. Players say it works great because they can wear it after training or a game for long periods of time, including during travel, at restaurants and to bed. Leading doctors, sporting personalities, trainers, physios, clubs and players recommend Intelligent Ice.

Different applications

Supported by medical evidence

Medical evidence has been telling us for years to use cold therapy for the first 48 to 72 hours. Why do people never do this, because normal ice or other gel packs will freeze to burn you and only last 15 to 30 minutes. People may put them on for a few minutes or 20 minutes here or there then stop, after which the temperature will rise again, allowing the blood to flow to the injured area which can cause continual inflammation, swelling and bruising resulting in a very painful and slow recovery. The first day or the next day many apply heat, which may feel heavenly at the time but can inflame the area further. Medical evidence supports the use of Intelligent Ice because this product can be worn continually for 48 to 72 hours day and night. Depending on the injury a major knee or hip reconstruction you can use it for weeks consult your doctor.

Reduce insurance premiums

Intelligent Ice could reduce insurance premiums because employees could recover faster and therefore, have fewer days off work. Always have Intelligent Ice available at work and at home.

Space technology cooling covers

The stretch cover material also acts as a compression bandage and extends the cooling period by 30% and is designed to attach to the different body parts.

Cures shin soreness

Intelligent Ice has been proven to cure shin soreness in horses when used day and night for 72 hours. Wrap a bandage over the ice boots to prevent the horse from damaging them. Trainers have found after just one night using the Intelligent Ice the soreness has gone and is great for old injuries. Also attach it immediately after exercise to prevent soreness or injuries. Attach the Intelligent ice around the horses neck and forehead for travelling in floats/trailers on hot days and around a greyhounds body for muscle soreness and injuries and when travelling to or from the races in hot weather. Intelligent Ice can reduce the body temperature from 37°C down to 13°C where applied.

Washing instructions

Hand or machine wash the covers in cold, warm or hot water below 30 degrees Celsius a mild detergent may be used. Do not bleach, iron, tumble-dry or dry clean. Do not store in direct sunlight or under heavy compression.
